Technical Information

Liquiphant M FTL51C

Vibronic

Point level switch for all kinds of liquids
with high corrosion-resistant coating

Application

The Liquiphant M is a point level switch which can be used in all liquids

- for temperatures from -50 °C to 150 °C (up to 230 °C on request)
- for pressures up to 40 bar
- for viscosity up to $10,000\text{ mm}^2/\text{s}$
- for densities $\geq 0.5\text{ g/cm}^3$ or $\geq 0.7\text{ g/cm}^3$, other settings available on request
- foam detection on request

The reliable function is not affected by flow, turbulence, bubbles, foam, vibration, solids content or buildup. The Liquiphant is thus the ideal substitute for float switches.

All the wetted parts of the sensor (process connection, extension pipe and tuning fork) are coated in enamel or various synthetic materials, making the point level switch suitable for applications in very aggressive liquids.

International approvals certify use in hazardous areas.

Your benefits

- Use in safety systems requiring functional safety to SIL2/SIL3 in accordance with IEC 61508/IEC 61511-1
- Optimally adapted to the process with a wide range of materials for corrosion-resistant coating
- Large number of process connections to choose from
 - Flanges for various standards
 - Universal usage
- Wide range of electronics, e.g. NAMUR, relay, thyristor, PFM signal output: suitable connection for every process control system
- PROFIBUS PA protocol: for commissioning and maintenance
- No adjustment: quick, low-cost startup
- No mechanically moving parts: no maintenance no wear, long operating life
- Monitoring of fork for damage: guaranteed function
- FDA-approved material (PFA Edlon)

Application

Point level detection

Maximum or minimum detection in tanks or pipes containing all kinds of liquids, including use in hazardous areas. Particularly suitable for very aggressive liquids that to high level of corrosion protection.

L00-FTL51Cxx-11-05-xx-xx-001

Function and system design

Measuring principle

The sensor's fork vibrates at its intrinsic frequency. This frequency is reduced when covered with liquid. This change in frequency causes the point level switch to switch.

Modularity

Point level switch

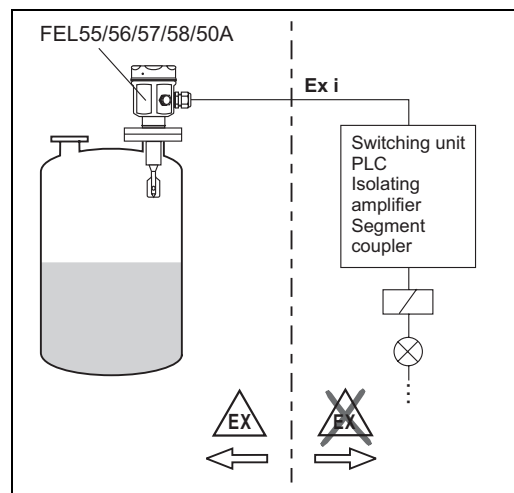

Liquiphant M FTL with electronic versions FEL51, FEL52, FEL54

---------------------------	---

Design	FTL51C: The flange, extension pipe and tuning fork are coated.
---------------	---

Input

Measured variable	Level (limit value)
Measuring range (detection range)	Depends on the mounting point or the length of the sensor with an extension pipe (up to 3000 mm for synthetic coating, and up to 1200 mm for enamel coating)
Density	Adjustment on the electronic insert > 0.5 g/cm ³ or > 0.7 g/cm ³ (other on request)

Electronic insert FEL51 (AC 2-wire)

Power supply

Supply voltage: 19 to 253 V AC
 Power consumption: < 0.83 W
 Residual current consumption: < 3.8 mA
 Short-circuit protection
 Overvoltage protection FEL51: overvoltage category III

Electrical connection

Two-wire AC connection

Switches the load directly into the power supply circuit via an electronic switch.

Always connect in series with a load!

Check the following:

- The residual current in blocked state (up to 3.8 mA)
- That for low voltage
 - the voltage drop across the load is such that the minimum terminal voltage at the electronic insert (19 V) when blocked is not undershot.
 - the voltage drop across the electronics when switched through is observed (up to 12 V)
- That a relay cannot de-energize with holding power below 3.8 mA.
 If this is the case, a resistor should be connected parallel to the relay. An RC module is available under the modification number MVT2Y1278.
- When selecting the relay, pay attention to the holding power / rated power (see "Connectable load")

L00-FTL5xxxx-04-05-xx-en-007

Output signal

I_L = load current (switched through)

< 3.8 mA = residual current (blocked)

= lit

= unlit

L00-FTL2xxxx-07-05-xx-xx-000

Safety mode	Level	Output signal	LEDs green	red
Max.		1 $\xrightarrow{I_L}$ 2		
		1 $\xrightarrow{< 3.8 \text{ mA}}$ 2		
Min.		1 $\xrightarrow{I_L}$ 2		
		1 $\xrightarrow{< 3.8 \text{ mA}}$ 2		

L00-FTL5xxxx-04-05-xx-xx-001

Signal on alarm

Output signal on power failure or in the event of damaged sensor: < 3.8 mA

Connectable load

- For relays with a minimum holding power/rated power > 2.5 VA at 253 V AC (10 mA) or > 0.5 VA at 24 V AC (20 mA)
- Relays with a lower holding power/rated power can be operated by means of an RC module connected in parallel.
- For relays with a maximum holding power/rated power < 89 VA at 253 AC or < 8.4 VA at 24 V AC
- Voltage drop across FEL51 max. 12V
- Residual current with blocked electrical switch: max. 3.8 mA.
- Load switched directly into the power supply circuit via the thyristor.

Transient (40 ms) max. 1.5 A, max. 375 VA at 253 V or max. 36 VA at 24 V (not short-circuit proof)

Electronic insert FEL52 (DC PNP)

Power supply
Supply voltage: 10 to 55 V DC
Ripple: max. 1.7 V, 0 to 400 Hz
Current consumption: max. 15 mA
Power consumption: max. 0.83 W
Reverse polarity protection
Overvoltage protection FEL52: overvoltage category III

Electrical connection
Three-wire DC connection
Preferably used with programmable logic controllers (PLC).
DI module as per EN 61131-2.
Positive signal at switching output of the electronics (PNP);
Output blocked on reaching limit.

L00-FTL5xxxx-04-05-xx-xx-001

Output signal

I_L = load current (switched through)
 $< 100 \mu A$ = residual current (blocked)
 = lit
 = unlit

L00-FTL2xxxx-07-05-xx-xx-000

			green	red
Max.		$L+ \xrightarrow{I_L} 3$		
		$1 \xrightarrow{< 100 \mu A} 3$		
Min.		$L+ \xrightarrow{I_L} 3$		
		$1 \xrightarrow{< 100 \mu A} 3$		

L00-FTL5xxxx-04-05-xx-xx-004

Signal on alarm
Output signal on power failure or in the event of damaged sensor: $< 100 \mu A$

- Connectable load**
- Load switched via the transistor and separate PNP connection, max. 55 V DC
 - Load current max. 350 mA (pulsed overload and short-circuit protection)
 - Residual current $< 100 \mu A$ (with transistor blocked).
 - Capacitance load max. $0.5 \mu F$ at 55 V, max. $1.0 \mu F$ at 24 V
 - Residual voltage $< 3 V$ (with transistor switched through);

Electronic insert FEL54 (AC/DC with relay output)

Power supply

Supply voltage: 19 to 253 V AC, 50/60 Hz or 19 to 55 V DC
 Power consumption: max. 1.3 W
 Reverse polarity protection
 Overvoltage protection FEL54: overvoltage category III

Electrical connection

Universal current connection with relay output

Power supply:
 Please note the different voltage ranges for AC and DC.

Output:
 When connecting an instrument with high inductance, provide a spark arrester to protect the relay contact.
 A fine-wire fuse (depending on the load connected) protects the relay contact on short-circuiting.
 Both relay contacts switch simultaneously.

* When jumpered, the relay output works with NPN logic.

** See "Connectable load"

L00-FTL5xxxx-04-05-xx-xx-002

Signal on alarm

Output signal on power failure or in the event of damaged sensor: relay de-energized

Connectable load

- Loads switched via 2 floating change-over contacts (DPDT).
- I~ max. 6 A (Ex de 4 A), U~ max. 253 V AC; P~ max. 1500 VA, $\cos \varphi = 1$, P~ max. 750 VA, $\cos \varphi > 0.7$
- I= max. 6 A (Ex de 4 A) bis 30 V DC, I= max. 0.2 A to 125 V
- When connecting a low-voltage circuit with double isolation according to IEC 1010, the following applies: total of voltages of relay output and power supply max. 300 V.

Electronic insert FEL55 (8/16 mA)

Power supply
Supply voltage: 11 to 36 V DC
Power consumption: < 600 mW
Reverse polarity protection
Overvoltage protection FEL55: overvoltage category III

Electrical connection
Two-wire connection for separate switching unit
For connecting to programmable logic controllers (PLCs) for example, AI module 4 to 20 mA to EN 61131-2.
Output signal jump from high to low current on limit.

L00-FTL5xxxx-04-05-xx-xx-000

L00-FTL5xxxx-04-05-xx-xx-000

Signal on alarm Output signal on power failure or in the event of damaged sensor: < 3.6 mA

Connectable load
■ $R = (U - 11 \text{ V}) : 16.8 \text{ mA}$
■ $U = \text{connection voltage: } 11 \text{ to } 36 \text{ V DC}$
Example:
PLC with 250 Ω with 2-wire version
 $250 \Omega = (U - 11 \text{ V}) / 16.8 \text{ mA}$
 $4.2 [\Omega/\text{A}] = U - 11 \text{ V}$
 $U = 15.2 \text{ V}$

Electronic insert FEL56 (NAMUR L-H edge)

Power supply Power consumption: < 6 mW at I < 1 mA; < 38 mW at I = 2.8 mA
Connection data interface: IEC 60947-5-6

Electrical connection **Two-wire connection for separate switching unit**

For connecting to isolating amplifiers acc. to NAMUR (IEC 60947-5-6), e.g. FTL325N, FTL375N from Endress+Hauser. Output signal jump from low to *high current on limit*.

(L-H edge)

Connecting to multiplexer:
Set clock time to min. 2 s.

L00-FTL5xxxx-04-05-xx-en-004

		+ 2.2 ... 2.8 mA 2 → 1		

L00-FTL5xxxx-04-05-xx-xx-003

Signal on alarm Output signal in the event of damaged sensor: > 2.2 mA

Connectable load ■ See Technical Data of the isolating amplifier connected according to IEC 60947-5-6 (NAMUR)

Electronic insert FEL58 (NAMUR H-L edge)

Power supply Power consumption: < 6 mW at I < 1 mA; < 38 mW at I = 3.5 mA
Connection data interface: IEC 60947-5-6

Electrical connection Two-wire connection for separate switching unit

For connecting to isolating amplifiers acc. to NAMUR (IEC 60947-5-6), e.g. FTL325N, FTL375N from Endress+Hauser. Output signal jump from high to low current on limit.

(H-L edge)

Additional function:
Test key on the electronic insert.
Pressing the key breaks the connection to the isolating amplifier.

 **Note!**
In Ex-d applications, the additional function can only be used if the housing is not exposed to an explosive atmosphere.

Connecting to multiplexer:
Set clock time to min. 2 s.

Output signal

 = lit
 = flashes
 = unlit

Signal on alarm Output signal in the event of damaged sensor: < 1.0 mA

Connectable load ■ See Technical Data of the isolating amplifier connected according to IEC 60947-5-6 (NAMUR)
■ Connection also to isolating amplifiers which have special safety circuits (I > 3.0 mA)

Electronic insert FEL57 (PFM)

Power supply

Supply voltage: 9.5 to 12.5 V DC
 Current consumption: 10 to 13 mA
 Power consumption: < 150 mW
 Reverse polarity protection

Electrical connection

Two-wire connection for separate switching unit

For connecting to Nivotester switching units FTL320, FTL325P, FTL370, FTL372, FTL375P (also with cyclical checking) from Endress+Hauser. Output signal jump of the PFM signal from high to low frequency when sensor is covered. Switching between minimum/maximum safety in the Nivotester.

Additional function “cyclical checking”: After interruption of the power supply, a test cycle is activated which checks the sensor and electronics without any change in level. Approved for overfill protection acc. to WHG (German Water Resources Act). The following can be switched at the electronic insert:

– Standard (STD):

Corrosion of the fork unlikely;
 simulation approx. 8 s
 tuning fork exposed – covered – exposed.
 This setting tests level reporting in the Nivotester during cyclical checking.

– Extended (EXT):

Corrosion of the fork possible;
 Simulation approx. 41 s: tuning fork exposed – covered – corroded – exposed.
 This setting tests level reporting and alarm notification in the Nivotester during cyclical checking.

L00-FTL5xxxx-04-05-xx-en-003

The check is activated and monitored at the switching unit.

Switching behavior of the connected device:

Fail-safe mode set at switching unit	Setting at FEL57	Fork	Switching status of relay in switching unit	
			on = energised	off = de-energised
			⚡ Test start (power off) > 3 s	⚡ End of test start (power on)

Output signal on power failure or in the event of damaged sensor: 0 Hz

Connectable load

- Floating relay contacts in the connected switching device Nivotester FTL320, FTL325P, FTL370, FTL372, FTL375P
- For contact load, see the Technical Data of the switching unit.

Electronic insert FEL50A (PROFIBUS PA)

Power supply

Bus voltage: 9 to 32 V DC

Bus current:

- 12.5 mA \pm 1.0
mA (software version: 01.03.00, hardware version: 02.00)
- 10.5 mA \pm 1.0
mA (software version: 01.03.00, hardware version: 01.00)

Electrical connection

Two-wire connection for power supply and data transfer

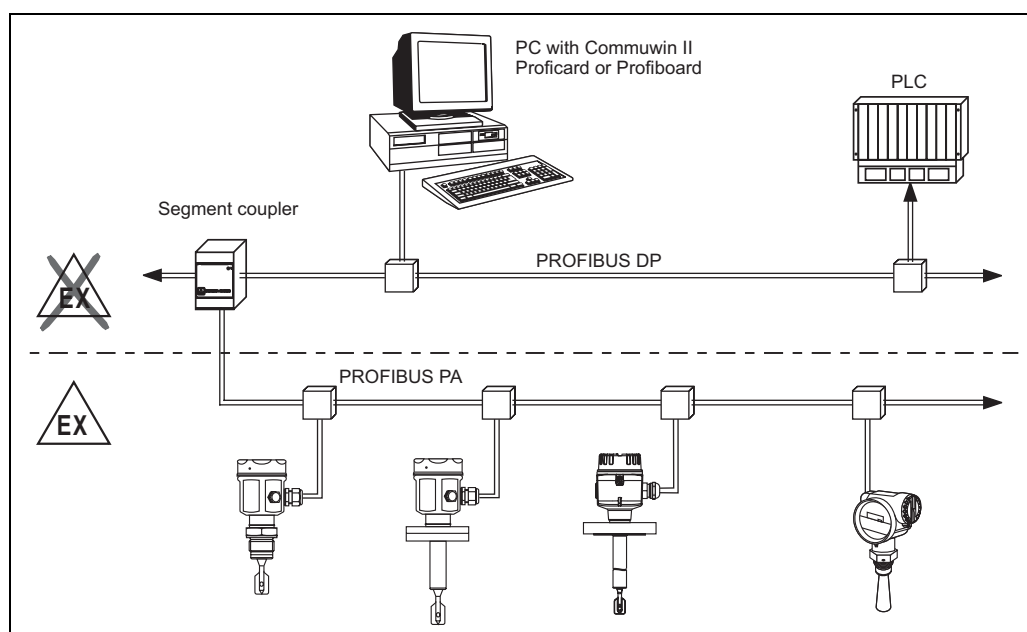

For connecting to PROFIBUS PA

Additional functions:

- Digital communication enables the representation, reading and editing of the following parameters:
Fork frequency, switch-on frequency, switch-off frequency, switch-on time and switch-off time, status, measured value, density switch.
- Matrix locking possible
- Switch to WHG mode possible (WHG approval).
- For a detailed description, see BA198F
- You can also visit www.profibus.com for more information

L00-FTL5xxxx-04-05-xx-xx-000

Signal on alarm

- Failure information can be opened using the following interfaces:
Yellow LED flashing, status code, diagnostic code; see BA198F

Electronic insert FEL50D (density)

Power supply

Frequency range: 300 to 1500 Hz
 Signal level: 4 mA
 Pulse height: 16 mA
 Pulse width: 20 μ S

Electrical connection

Two-wire connection at Density Computer FML621

For connecting to the density and concentration computer FML621.

The output signal is based on pulse technology.
 With the aid of this signal, the fork frequency is constantly forwarded to the switching unit.

Caution!

Operation with other switching units, such as FTL325P, is not permitted.

This electronic insert cannot be installed in devices that were ori

TI420Fen004

Signal on alarm

Output signal on power failure or in the event of damaged sensor: 0 Hz

Adjustment

In the Liquiphant M modular system, the option of an adjustment is also provided in addition to the electronics (see feature 60: "Accessories").

There are three types of adjustment:

Standard adjustment (see ordering information for additional options, basic version A)

- Here, two fork parameters are determined to describe the sensor characteristics, indicated in the adjustment report and provided with the product.

These parameters must be transmitted to the Density Computer FML621.

Special adjustment (see ordering information for additional options, special adjustment, density H₂O (K) or special adjustment, density H₂O with 3.1 certificate (L))

- Here, three fork parameters are determined to describe the sensor characteristics, indicated in the adjustment report and provided with the product.

These parameters must be transmitted to the Density Computer FML621.

Greater accuracy is achieved with this type of adjustment (see also "Performance characteristics").

Field adjustment

- During field adjustment, a density value actually determined by the customer is entered and the system is automatically adjusted to this value (wet adjustment).

Note!

Further information on Liquiphant M Density is available in Technical Information TI420F. This document is available for download at www.endress.com => Download.

Operating principle

Measuring the density of a liquid medium in pipes and tanks. Also suitable for use in hazardous areas, and preferably for applications in the chemical and food industry.

- * Pressure and temperature information required depending on the application.*
- 1. Liquiphant M sensor with electronic insert FEL50D (pulse output);*
 - 2. Temperature sensor (e.g. 4 to 20 mA output);*
 - 3. Pressure transmitter (4 to 20 mA output);*
 - 4. Liquiphant density and concentration computer FML621 with display and operating unit*

Hysteresis	<p>ECTFE: approx. 2 mm PFA: approx. 2 mm Enamel: approx. 2.5 mm</p>	
Influence of medium temperature	<p>ECTFE: max. +1.4 mm to -2.8 mm (-50 °C to +120 °C) PFA: max. +1.4 mm to -2.8 mm (-50 °C to +150 °C) Enamel: max. +0.6 mm to -1.5 mm (-50 °C to +150 °C)</p>	
Influence of medium density	Max. +4.8 mm to -3.5 mm (0.5 g/cm ³ to 1.5 g/cm ³)	
Influence of medium pressure	<p>ECTFE: max. 0 mm to -2.0 mm (0 bar to 40 bar) PFA: max. 0 mm to -2.0 mm (0 bar to 40 bar) Enamel: max. 0 mm to -1.0 mm (0 bar to 25 bar)</p>	

Operating conditions

Installation

Installation instructions

Switch points ▷ on the sensor depend on the mounting position, with reference to water,
Density 1 g/cm³, 23 °C, p_e 0 bar.

Note!
The switch points of the Liquiphant **M** are at other positions to those of the previous version Liquiphant **II**.

Synthetic coating:

Enamel coating:

Examples of mounting

Optimum mounting, without problem even with high viscosity:

Note!

Position the fork so that the narrow edge of the tines is vertical to ensure that the liquid can run off easily.

With buildup on the tank walls:

* Ensure that there is sufficient distance between the buildup expected on the tank wall and the fork.

Mounting positions with low viscosity (up to 2000 mm²/s):

* Deburr the nozzle surfaces

Mounting in piping from 2"

Flow velocities up to 5 m/s for viscosity 1 mm²/s and density 1 g/cm³.
(Check the function for other medium conditions.)

L00-FTL51Cxxx-11-05-xx-xx-005

Liquiphant M FTL51C
in the event of severe dynamic load.

L00-FTL51Cxxx-11-05-xx-xx-005

Ensure adequate space outside the
tank for mounting, connection and
configuration

L00-FTL51Cxxx-11-05-xx-xx-005

Orientation

FTL51C with short pipe (up to approx. 500 mm) - any position,
FTL51C with long pipe - vertical

Environment

Ambient temperature range Permitted ambient temperature T_a at the housing depending on the medium temperature T_p in the tank:

* Additional temperature range for devices with a temperature spacer or pressure tight feed-through.
Maximum ambient temperature with FEL50D/FEL50A in hazardous areas.

**

Medium temperatures up to 230 °C on request!

The difference in temperature between the process and ambient side ($T_p - T_a$) of the flange with ECTFE and PFA may not exceed 60 °C. For this reason, the flange might have to be included in the tank insulation where necessary.

Ambient temperature limits -50 °C to +70 °C (function with restricted data)

Storage temperature -50 °C to +80 °C

Climate class Climate protection to IEC 68, Part 2-38, Fig. 2a

Material

Material specifications as per AISI and DIN-EN.

Parts in contact with process

- Process connection and extension pipe: 316L (1.4435) coated
- Tuning fork: 316L (1.4435) coated
- Flanges coated:

Layer thickness	ECTFE	PFA (Edlon™)	PFA (RubyRed)	PFA (conductive)	Enamel
Lower limit	0.5 mm	0.45 mm	0.45 mm	0.45 mm	0.4 mm
Upper limit	1.6 mm	1.6 mm	1.6 mm	1.6 mm	0.8 mm
Carrier material	316L (1.4404)	316L (1.4404)	316L (1.4404)	316L (1.4404)	1.0487

Parts with no process contact

- Tuning fork/housing seal: EPDM
- Temperature spacer: 316 L (1.4435)
- Pressure tight feed through: 316L (1.4435)
- Grounding at housing (outside): 304 (1.4301)
- Nameplate at housing (outside): 304 (1.4301)
- Cable glands
 - Housing F13, F15, F16, F17: polyamide (PA)
 - With B or C approval (→  31 ordering information): nickel-plated brass
 - Housing F27: 316L
 - Housing T13: nickel-plated brass
- Polyester housing F16: PBT-FR with PBT-FR cover or with PA12 transparent cover
 - Cover seal: EPDM
 - Nameplate glued: polyester film (PET)
 - Pressure compensation filter: PBT-GF20
- Stainless steel housing F15: 316L (1.4404)
 - Cover seal: silicone
 - Safety claw: 304 (1.4301)
 - Pressure compensation filter: PBT-GF20, PA
- Aluminum housing F17/F13: EN-AC-ALSi10Mg, plastic-coated
 - Cover seal: EPDM
 - Safety claw: nickel-plated brass
 - Pressure compensation filter: silicone
- Stainless steel housing F27: 316L (1.4435)
 - Cover seal: FVMQ (optional: EPDM seal available as spare part)
 - Safety claw: 316L (1.4435)
- Aluminum housing T13: EN-AC-ALSi10Mg, plastic-coated
 - Cover seal: EPDM
 - Safety claw: nickel-plated brass

Process connections

- Flanges made of 316L (1.4404) – synthetic coating; flanges made of 1.0487 (ASTMA 529) – enamel coating
- Flanges to EN/DIN from DN 25, for standards see "Product structure," to ANSI B16.5 from 1", to JIS B 2238 (RF) from DN 50

Human interface

Electronic inserts

With FEL51, FEL52, FEL54, FEL55:
2 switches for safety mode and density change,
green LED to indicate operational status,

red LED to indicate the switching status,
flashes in the event of corrosion damage on sensor
or if the electronics are defective

With FEL56:
2 switches for safety mode and density change,
green LED flashes to indicate operational status,

red LED to indicate the switching status,
flashes in the event of corrosion damage on sensor
or if the electronics are defective

With FEL57:
2 switches for density change and
cyclical checking,
green LED to indicate operational status,
yellow LED to indicate the covered status,
flashes in the event of corrosion damage on sensor
or if the electronics are defective

With FEL58:
2 switches for safety mode and density change,
green LED flashes quickly to indicate operational status,

flashes slowly in the event of corrosion damage on sensor
or if the electronics are defective

yellow LED to indicate the switching status,
Test key – breaks the cable connection

With FEL50A:

- 8 switches for configuring the device address
- green LED to indicate operational status,
pulsing to indicate communication;
- yellow LED to indicate the switching status,
flashes in the event of corrosion damage on sensor
or if the electronics are defective

With FEL50D:

- yellow LED: to indicate the validation of the measurement
- green LED: to indicate the operational status
- red LED: to indicate faults

				N6	F15 316L	IP66;	M12 connector	
				Y9	Special version			
					* F27 housing in preparation.			
60				Additional options 1:				
				A	Not selected			
				K	Special adjustment, density H20			
				L	Special adjustment, density H20, EN10204-3.1			
				S	GL/ABS marine approval (max. 1600 mm)			
				Y	Special version			
70				Additional options 2:				
				A	Not selected			
				B	Temperature spacer			
				C	2nd line of defence > pressure tight feed-through			
				Y	Special version			
FTL51C -				Complete product designation				
Note!								
The basic weight includes the compact sensor, electronic insert and polyester housing								

Accessories

Transparent cover

For polyester housing F16
 Material: PA 12
 Weight: 0.04 kg
 Order number: 943461-0001

L00-FTL5xxxx-03-05-xx-xx-016

Cover with sight glass

For stainless steel housing F15
 Material: AISI 316L
 Weight: 0.16 kg
 – With glass sight glass
 Order number: 943301-1000
 – With PC sight glass
 Order number: 52001403
 (Not for CSA, General Purpose)

L00-FTL5xxxx-03-05-xx-xx-017
