

VISCO JET®
- the original

VISCO JET® VJ400

Wall-mounted Column Stirrer

► Special advantages

- Cone principle for gentle stirring
- Low rotational speeds
- No air inclusion
- No foam formation
- No product warming

► A quantum leap in mixing technology

The VISCO JET® system is the original one by VISCO JET®, a conical, slow-running, momentum-based range of stirrers. This principle enables the efficient mixing of a range of products even at low circumferential speeds.

► Stirring quality

Just hang the outstanding advantages of the VISCO JET® mixing system on the wall? No! The column version with linear guiding by ball-bushing set running on ground, hard-chrome-plated shafts demonstrates our quality-in-all-details approach.

The manual height adjustment – the stirrer is counterbalanced by a weight in the column and connected to it by a cable which passes over a pulley – is light to use, stepless, and easily clamped in any position. A safety switch ensures that the stirrer can only be switched on when it is in its correct operating position.

► Technical Data

- Drive: P=1.1 kW,
230/400 V, 50 Hz
Variable-speed gear-motor unit with mechanical speed regulation using a handwheel with a speed scale
- Stirrer shaft: d=30 mm, L=800 mm
with a sleeve coupling connecting it to the drive shaft
Shaft end has G 1/2", male thread, material is stainless steel 1.4571 (V4A)
- Stirrer head: VISCO JET® 3-fold, d₂=210 mm
Hub thread G 1/2", material is stainless steel 1.4571 (V4A)
- Overhang: 505 mm from wall
- Lift stroke: 500 mm
- All other parts (except stirrer shaft and stirrer head) are made from mild steel and painted (colour RAL 9010, pure white).

► Options

- Fully-equipped ATEX version
- Drum-clamping device including safety switch
- Drip tray, swivelling, completely assembled
- Stirrer head VISCO JET® 3-fold, d₂=320 mm
- With quick-change coupling, complete and mounted on the drive
- Shaft-protection unit, complete
- Available as floor-mounted stand stirrer VISCO JET® VJ400 BH
- Complete control system for ⚡ and normal versions
- Stirrer stand available in stainless steel
