

AN ISO 9001 REGISTERED COMPANY

Series WK 74 Tube Bore Clean Valves

*Stainless Steel Ball Valves for
high-purity and aseptic processes*

A Clean Valve to write your specs around:

Tube bore, metallurgy, surface finish, shut-off, cleanability and automation

Flowserve Worcester Controls Series WK 74 clean valves operate dependably in the pharmaceutical, biotech, food, cosmetic, paint, chemical and semi-conductor manufacturing industries where microbes, media deposits, mineral impurities and cross-contamination can threaten the quality of the product. The high-purity design, high vacuum rating, high cycle life and pressure/temperature rating of these valves make them ideal for applications from sterile steam to nutrient inlets to high-purity water. The performance of the WK 74 Tube Bore Clean Valve is based on a combination of high standard specifications.

Tube Bore*

The inside diameter of WK 74 valve components are tube bore dimensions so that the valve precisely matches the tubing it is welded to. This prevents buildup of pyrogens or bacteria.

Low Ferrite Content

WK 74 valves are made of 316L stainless steel with a guaranteed ferrite content of less than 5%. This prevents rouging resulting from minerals and impurities drawn from higher ferrite content metals.

High Integrity Welds

The metallurgy of WK 74 body and extended tube ends assures the integrity of the orbital welding. The tube ends have a verifiable sulfur content between .005% and .016%. Too much sulfur causes a lack of penetration of the orbital welding. With a low sulfur content, comparable to that of the process tubing, the quality of the weld is assured.

CMTR's

Provided standard with all valves.

High-Cycle Sealing, Bubble-Tight Shut-off

Seats of TFE, Reinforced TFE and Polyfill® provide bubble-tight shut-off through the valve, even under conditions of high-vacuum and high-cycle operation. High-cycle stem seals assure external sealing when the valve is automated.

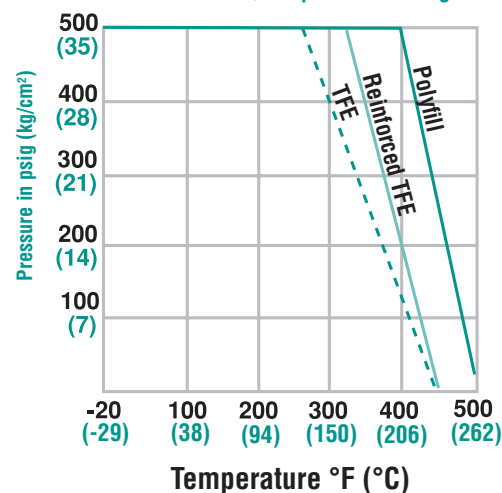

Steam Service Capability

Polyfill is a TFM material with carbon and graphite fillers with excellent high temperature properties. These standard seats are capable of up to 275 working steam pressure (WSP) making the WK 74 valve ideal for sterile steam applications.

Fire Rated Design

Specify the "FWK" design for flammable high-purity liquids and gases. Four-sided body seal provides maximum safety against external leaks. Qualified to API 607 Edition 4.

Seat Pressure/Temperature Ratings

*For standard reduced port clean valves, refer to brochure WCABR1035.

*For applications requiring forged stainless steel parts, refer to brochure WCABR1036.

Specifications

Valve Size:	1/2", 3/4", 1", 1 1/2", 2", 3", 4"
Styles:	3-piece, tube bore valve, bi-directional flow
*Pressure Rating:	Quick disconnect – varies according to clamp type and gasket material. XBO - 500 psig.
Vacuum Rating:	1 x 10 ⁻³ torr (1 x 10 ⁻⁵ torr optional)
Body and Pipe Ends:	Investment cast stainless steel to ASTM A351 CF3M. Ferrite content less than 5%. XBO tube ends have verifiable sulfur content between .005% to .016%.
Ball:	Solid parallel bore (no vent hole) stainless steel, ASTM A479-316L condition A.
Seats:	TFE, TFM, Polyfill, Reinforced TFE
Body Seals:	TFE, Graphite
Stem:	One-piece, bottom entry stainless steel ASTM A479-316L, condition A.

*The final valve pressure and temperature rating is established by the rating of two items: end connections and seat/body seal material. The lowest rating prevails.

Stem Seals:	TFE, TFM, Polyfill and PEEK.
External Parts:	300 Series stainless steel
Interior Surface Finish:	20 Ra Standard, 10 Ra optional (electropolish)
Seat/Seal Leakage:	Standard valves, less than 1x10 ⁻⁶ cc He/Sec. inboard and through the valve, bubble-tight (1x10 ⁻⁴ cc He/Sec.). With vacuum preparation, leakage will be less than 2x10 ⁻⁹ He/Sec. All valves 100% tested to bubble-tight standards in a class 100 clean room and double bagged.
Standard and Approvals:	All wetted parts comply with FDA requirements (21 CFR) and are USDA approved. Qualified to API 607 Edition 4.

*Valves meet API 607 Edition 4.

Ordering Example: A 1" Series WK 74 with a stainless steel body, pipe ends, ball and stem, Polyfill seats, TFE body seals, quick disconnect ends, and electropolished finish.

CAUTION: Ball Valves can retain pressurized media in the body cavity when closed. Use care when disassembling. Always open valve to relieve pressure prior to disassembly. Due to continuous development of our product range, we reserve the right to alter the dimensions and information contained in this leaflet as required.

Flowserve Corporation has established industry leadership in the design and manufacture of its products. When properly selected, this Flowserve product is designed to perform its intended function safely during its useful life. However, the purchaser or user of Flowserve products should be aware that Flowserve products might be used in numerous applications under a wide variety of industrial service conditions. Although Flowserve can (and often does) provide general guidelines, it cannot provide specific data and warnings for all possible applications. The purchaser/user must therefore assume the ultimate responsibility for the proper sizing and selection, installation, operation, and maintenance of Flowserve products. The purchaser/user should read and understand the Installation Operation Maintenance (IOM) instructions included with the product, and train its employees and contractors in the safe use of Flowserve products in connection with the specific application.

While the information and specifications contained in this literature are believed to be accurate, they are supplied for informative purposes only and should not be considered certified or as a guarantee of satisfactory results by reliance thereon. Nothing contained herein is to be construed as a warranty or guarantee, express or implied, regarding any matter with respect to this product. Because Flowserve is continually improving and upgrading its product design, the specifications, dimensions and information contained herein are subject to change without notice. Should any question arise concerning these provisions, the purchaser/user should contact Flowserve Corporation at any one of its worldwide operations or offices.
