CHECK VALVES

BALL, SPRING AND AIR BLOW CHECK VALVES

CHECK VALVES....

Check Valves are widely used for both sanitary and industrial applications to prevent backflow of product.

Ball Check Valves are designed to allow full product flow during processing. Once the product flow stops the ball rolls back to the seat at inlet preventing back flow. Ball Check Valves are commonly used with liquid products. Sizes range 1 1/2" - 3".

Spring Check Valves are designed to assist closure pressure to create a positive shutoff. They are commonly used with liquid products. Sizes range 1/2" - 4".

Both valves are offered with standard clamp ends. Other connections are available upon request. Valves are made of T316L stainless steel.

Air Blow Check Valves are designed to evacuate lines of product or CIP solutions. Air Blow Check Valves are made of T316L Stainless Steel.

ORDERING SPECIFICATIONS....

- Specify:**
- Quantity
 - Product description or Part No.
 - Size
 - Material Type

Info:

Conform to 3A Sanitary Standards for Vacuum Breakers and Check Valves. Standard number 58-01. Certificate Authorization number 3573. Seats and Seals are FDA approved.

BALL CHECK VALVE

INFORMATION

- Precision machined seat to ensure positive shut-off
- Two-piece construction for easier alignment during installation
- Other connections available upon request
- Buna-N and Viton® elastomers
- Polished ID and OD
- All metal contact surfaces of T316L stainless steel
- Sizes range from 1 1/2" through 3"
- Buna Ball & Gaskets Standard
- Meets 3A requirements

SPRING CHECK VALVE

INFORMATION

- One piece stem with O-Ring construction (easy seal replacement and positive shut-off)
- Viton O-Ring standard (other available upon request)
- Clamp connections standard (other connections available upon request)
- Full Polished ID and OD
- All metal contact surfaces of T316L Stainless Steel
- Sizes range from .5" through 4.0"

PARTS BREAKDOWN

AIR BLOW CHECK VALVE

AIR BLOW CHECK VALVE ABILITIES

- VNE Air Blow Check Valves are designed to evacuate lines of product or CIP solutions.
- Fail Safe Operation - backflow of product or CIP solution prevented by simple air to open, spring to close operation.
- Easy Assembly / Disassembly - Clamp connections permit quick disassembly and assembly for replacing Filter Media, cleaning or inspection.
- Made of T316L stainless steel offered with EPDM or Viton® Stem and Gasket.
- Meets 3A standards - for applications requiring a final filtering of air prior to entering tank or pipelines.
- Note:
The Air Blow Check Valve must be used with a Filter Disc. These Filter Discs are available in packages of 50.

- * For use on Ball Check Valves:
 - 1 1/2" Ball Check Valve uses 2 1/2" Air Blow Valve
 - 2" Ball Check Valve uses 3" Air Blow Valve
 - 2 1/2" Ball Check Valve uses 4" Air Blow Valve
 - 3" Ball Check Valve uses 4" Air Blow Valve
