

Kenics Static Mixers solve food processing problems

Kenics Static Mixers give you in-line, continuous food mixing and processing with no moving parts, no maintenance, and no external power. Blend or disperse liquids, gases, or solids in a short length of pipe. Uniformly and quickly heat or cool ingredients. Clean-in-place models are standard. Numerous applications in the food and pharmaceutical industry have built Kenics Mixers' reputation for cleanliness and cleanability. A broad range of continuous mixing, dispersion and cooling applications have yielded considerable improvements in processing speed, control and economics.

Typical Applications

Blending	Dispersion	Heating/ Cooling
Fruit Juice Concentrates	Vegetable Oil/Acid	Chocolate
Corn Syrup	CO ₂ /Liquid Beverages	Corn Syrup
Flavorings	H ₂ /Vegetable Oil	Milk
Colorants	NaOH/Cotton seed Oil	Fruit Juice
Ice Cream	Vegetable Oil/Water	Cheese
Yogurt		Starch Solutions
Cheese		Margarine
Peanut Butter		Salad Dressing

The benefits of Kenics Static Mixer Technology include:

- No Moving Parts
- Clean-In-Place
- Sanitary Construction
