

Cipriani Harrison Valves Corp.

Ball Valve  
52 Series

New

#### Application

Sanitary ball valves are used in stainless steel piping systems for isolation, either manually or automatically operated. The full port design with zero flow restriction makes it an optimum choice for viscous or particulate liquids.

#### Working Principle

A precision ball with a full port is positioned inside the valve body between two flanges and two PTFE valve seats. The 90° rotation of the valve stem, through the handle or a pneumatic actuator, is transferred to the ball thereby opening or closing the valve.

#### Standard Design

The valve consists of a valve body, two flanges, PTFE valve seats, EPDM O'Rings, ball, stem and a handle or actuator. All Seats and Seals are made from FDA approved materials.

The valve body, flanges and ball are made of forged 316L and 304L stainless steel which ensures non porous, smooth and dimensionally stable construction.

The valve is designed to maintain a full flow rate, with a minimum pressure drop and it is fully drainable. A Bottom entry, precision machined stem with a live loaded PTFE thrust washer ensures a smooth rotation at various temperatures and pressure conditions.

Purge ports are provided on the valve body for SIP / CIP applications.

#### Available Sizes

1", 1 1/2", 2", 2 1/2", 3", 4"

#### Options

Automatic operation by vertical pneumatic actuator.  
\* Consult the factory regarding horizontal actuators.

Electrical control unit with micro switches or proximity switches and solenoid valve for remote operation.

**End connections:** Sanitary Clamp, Butt-Weld, Extended Butt Weld (for high purity applications), I-Line or others on request.

**Material:** AISI 316L or AISI 304L

**Handle Options:** 90° Open / Close  
Universal Snapping

# Ball Valve 52 Series

## TECHNICAL SPECIFICATIONS :

### Material :

Product wetted steel parts.....AISI 316L/AISI 304L  
Other steel parts.....AISI 304

### FDA Seals :

Valve Seat.....TFM PTFE  
O’ring.....EPDM  
Cavity filler (optional).....TFM PTFE  
\*Other Material available upon request

### Nominal Pressure :

Maximum product pressure.....200 PSI maximum (14 Bars)  
Test pressure 235 PSI (16 Bars)  
(Leakage test according to BS EN 12266-1)  
Supply Pressure for  
Air Actuator (Min. - Max. Range).....70-115 PSI (Dry & Filtered Compressed Air)

Temperature Range :.....-60° Degrees Fahrenheit to +300° Degrees Fahrenheit  
\*Other seal material available for higher temperatures

### Surface Finish :

Surface in contact with product.....Ra <= 25 µ in (Grit 220g)  
Optional.....Ra <= 15 µ in (Grit 320g)  
\*Electropolishing available upon request.

Connections .....Sanitary Clamp (ISO 2852 / BS 4825-3)  
Optional.....Butt Weld (ISO 2037 / BS 4825-01)  
I-Line  
Other connections on request

Purge Port Connections.....1/4” Male BSP  
\* Please see page 8 for purge port adapters

Cavity fillers on request  
\* Consult the factory  
for torque values with  
cavity fillers.
