Type 3233/2031

Flow meter

Tandem valve

The manually-operated diaphragm valve in compact form of the Type 3233 consists of a flow-optimised stainless steel body with various surface finishes, a diaphragm and a manual actuator.

The material combinations are selectable. The diaphragm is both a switch element and a sealing element to the outside. It can be easily replaced. The flow can be continually adjusted with the handwheel.

The valves have no dead volume and can be mounted to be self-draining. This enables high flow capacities and a variety of applications to be realized.
